Austin College’s January Term offers students the chance for exploration and discovery—and a change of pace from the fall and spring terms. They take only one course—so might participate in a course enhanced by travel experiences, explore a special interest topic, delve into an academic study in depth, conduct research with a faculty member, or investigate career options through an internship. Samples of recent course offerings are listed below.

**Travel Courses**
In addition to courses offering immersion in culture and foreign language study in Spain, Italy, Germany, France, Argentina, and several other locations, classes ranging from history to art to science to business are enhanced by on-site experience and inquiry around the globe:
