

Idea Center Printing Station Resolution

Sponsor: Nick Pernik, Representative

- Having heard** many students opinions, wishes, and desires for a printing station in the Idea Center for scientific lab and presentation purposes,
- Understanding** that many students use the Idea Center habitually for more than just classes; including but not limited to; group meetings, study clusters, and research,
- Deeply Convinced** that fulfilling these desires would not only increase the convenience of having a resource to print, but also increase the probability of higher course grades for all classes,
- Be it resolved** that in an effort to increase the university GPA, add to campus improvement, and to advocate student personal/academic concerns, Student Assembly approves the purchase of a new printing station consisting of:
- HP LaserJet Printer (Model: M401) as suggested by the Information Technology Department,
 - OfficeMax Steel Mesh 5-Tier File Tray, Letter Size, 14 3/4" x 13 3/4" x 11 5/8", Silver 9 (\$27.99) as suggested by Dr. Steve Goldsmith, and
 - A table that matches the rest of the Idea Center décor (\$371.60), as suggested by Dr. Steve Goldsmith,
- by the Student Assembly, to be installed by Information Technology at no cost to the Assembly.
- Note:** Paper supply, toner supply, and all technological complications will be handled by Pam Bennett and Information Technology.
- Note:** The printer in the IC will be placed on the AC web print system, and can from there be monitored by IT for diagnostic reports that send notifications and status concerns for ink/toner in the printer at any given time, and once the toner is low IT will replace it.
