

# RCR Training in Courses Information Sheet

Course Name: \_\_\_\_\_ Instructor: \_\_\_\_\_

Department Code (e.g. PSYCH) \_\_\_\_\_ Number: \_\_\_\_\_

Different types of scholarship use different approaches and need different forms of RCR education. As such, RCR education for student researchers should be consistent with the standards for each discipline or division (e.g. humanities, fine arts, sciences, social sciences). The RCR education requirement for students must include, at minimum, 1) data acquisition, management, sharing, and ownership including issues of fabrication, falsification, and plagiarism; and 2) other issues of research misconduct relevant within the discipline. Please, identify the topics of responsible conduct of research and/or issues of research misconduct that is relevant within the discipline presented to the students in the context of the class.

Required to meet the status

Data acquisition, management, sharing, and ownership including issues of fabrication, falsification, and plagiarism

Additional topics for discussion/presentation (check all that are relevant):

- |   |   |
|---|---|
| <input type="checkbox"/> Intellectual property rights         | <input type="checkbox"/> Environmental impacts of research    |
| <input type="checkbox"/> Broader implications of research     | <input type="checkbox"/> Collaboration                        |
| <input type="checkbox"/> Chemical hygiene and safety          | <input type="checkbox"/> Peer review                          |
| <input type="checkbox"/> Human subjects                       | <input type="checkbox"/> Financial responsibility             |
| <input type="checkbox"/> Animal research                      | <input type="checkbox"/> Conflicts of interest                |
| <input type="checkbox"/> Mentorship responsibilities          | <input type="checkbox"/> Other relevant practices (see below) |
| <input type="checkbox"/> Limits of free expression            | <input type="checkbox"/> Management                           |
| <input type="checkbox"/> Publication and authorship practices | <input type="checkbox"/> Ownership of fabrication             |
| <input type="checkbox"/> Data acquisition                     | <input type="checkbox"/> Ownership of plagiarism              |
| <input type="checkbox"/> Sharing                              | <input type="checkbox"/> Ownership of falsification           |

I confirmed that as part of the course the above selected topic(s) are overtly discussed and intentionally addressed for a minimum of one class period during the semester.
