### Opening Convocation, 7 p.m.

August 23

### First Day of Classes

August 24

### Labor Day Admission Preview

September 4

## A Solar System Phenomenon!

A rare event comes this way **August 21** in a partial solar eclipse—and it shouldn't be missed, according Dr. David Baker, Austin College professor of

physics. While solar eclipses do happen once or twice a year, he explained that they pass through a narrow path on the Earth and are visible to only a small fraction of the planet's population at a given time. The next time a partial solar eclipse happens in north Texas will be 2023. In 2024, the Bells and Bonham area, just to the east of Sherman, will experience a total eclipse.

## **TEDxAustinCollege 2017 - "Pieces of a Mosaic"**

As a mosaic is created from pieces of many sizes, colors, shapes, and elements, our global community includes individuals of diverse cultures, backgrounds, abilities, and experiences.

Coming together, we can fashion a masterpiece with our varying ideas, beliefs, functions, and potentials. How then can we inspire diverse individuals to join together to create a more beautiful world mosaic?

## Casting Lines at the Lake Campus

Texoma area.

"Fishing experience in our group ranges from none to fairly experienced, and all the way to very experienced," says group president Shane Brooks '18. "Students do not even need a pole to join the group, because we share all of our fishing gear! We really enjoy having members with no experience at all, because we are able to hook them on the sport of fishing."

The group organizes fishing trips, and participates in JanServe and Great Days of Service where they clean up favorite fishing areas, such as the Denison Dam. Members aspire to create a competitive bass fishing team and potentially host an annual tournament at the Lake Campus for local anglers on Texoma.

Membership for this organization is free and open to any Austin College student with an interest in the sport of fishing.
