Action Resolution: Bike Repair Station

Sponsors: **Ahana Shetty**, Freshman Class Representative

Co-sponsors: **Emily Davis**, Junior Class Representative **Liberty Chanin**, Sophomore Class Representative

- Aware:** Many Austin College students have bicycles on campus. Students rely on their bicycles as a means for transportation. Currently, repairing a bicycle would require a student to wait to go home or request for transportation to service their bicycles when faced with a problem.
- Having Seen:** The inability to be able to repair their own bike causes a problem for many students and costs them time and money.
- Convinced:** Austin College students would benefit from having bike repair services on campus to service their bikes whenever needed. A bike repair station could influence current and potential students to bring their own bicycle as a green alternative to a means of transportation around the Austin College Campus
- Be it Resolved:** Student Assembly will purchase the Fixit from the Park Catalog and the costs to install it. The total price of this purchase will be \$1,850.65 for the product and shipping charges.
- Noting:** The bike repair station will be placed near the Jackson Technology building near the oak tree between a bollard and brick raised planter. The tree would provide shade to the students working on their bikes. We are also adding the cost to buy the anchors for installation. The bike repair station is an independent station and hence, no organization such as student life, the physical plant or the Student Assembly are responsible for checking on the station. Student Assembly will be solely responsible for purchase of the

station. However, if any damage does occur, a work order can be placed to request the Physical Plant to fix it.

Also Noting:

David Turk and the Physical plant will install it on campus.
